Enrollment 360 Dashboard

See demand. Plan capacity. Support students earlier.

Give district and school leaders one view of enrollment, attendance, campus capacity, and student support signals. See where demand is changing and decide what to investigate next.

ENROLLMENT SUMMARY

Track enrollment, dropouts, average daily attendance, and capacity utilization alongside year-over-year movement.

Request a Demo

Plan for demand across every campus

Connect enrollment movement with the decisions it affects: staffing, facilities, and where students can access services.

01

Track enrollment movement

Compare current counts with prior years and see where enrollment or attendance is changing.

02

Understand capacity

Compare enrollment with available capacity by campus or school type to spot pressure and room to grow.

03

Plan for future demand

Review projections and scenarios before committing to staffing, programs, or facility changes.

04

Focus early support

Use school-level risk summaries to guide professional review and prioritize outreach.

A shared view for district and school leaders

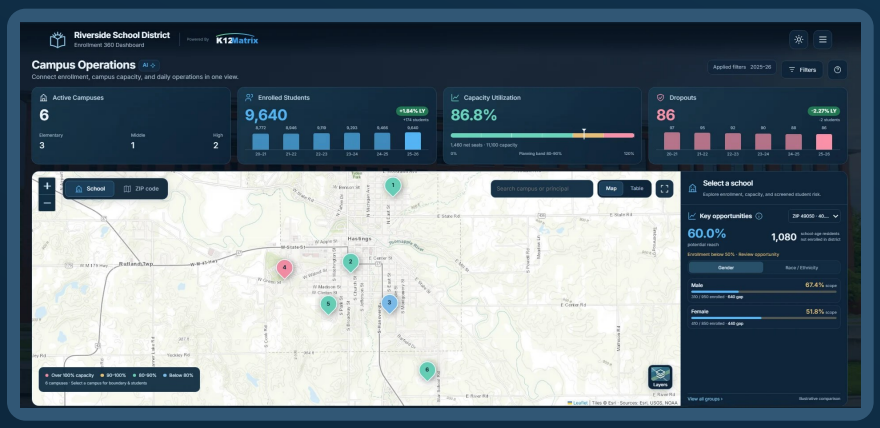

Superintendents
Compare schools and plan districtwide staffing, services, and facilities.

Principals
Review school-level enrollment, attendance, capacity, and signals for follow-up.

From campus patterns to future needs

Campus operations

Switch between map and table views to compare campus demand and capacity. ZIP-code and population context, where available, helps teams ask better questions about access and school boundaries.

Enrollment forecasting

Review upcoming-year projections informed by historical enrollment and cohort survival analysis. Compare scenarios and school outlooks to plan for changes in staffing, programs, and space.

Use scenarios to compare assumptions. Treat projections as planning estimates.

Prioritize student support

Review school-level risk groupings and early warning signals to identify where staff may need to follow up. Use the indicators for professional review, not automated decisions about students.

STUDENT AT RISK / PUBLIC PREVIEW

AI insights for leadership discussions

Use AI-assisted summaries to explore questions about enrollment movement, capacity, and risk patterns. Check summaries against district data and policy before acting.

See it in action

Tell us what you need to plan for. We'll tailor the walkthrough to your district's enrollment, capacity, and student support priorities.
