Strategic Plan Dashboard

A clearer view of strategy, action, and outcomes.

From district goals to measurable outcomes, make every part of your strategic plan easier to see, understand, and act on.

School districts often have strategic plans, but lack a clear, transparent way to show real progress. K12Matrix connects goals, initiatives, action items, and indicators so the people responsible for the plan can follow the work and its results.

For superintendents, district leaders, school boards, and communities.

AI-powered assistance helps users explore district information in plain language.

Explore the Live Demo

From a published plan to visible progress.

A shared view helps leaders, staff, families, and communities understand what is moving forward and what needs attention.

Keep strategy connected to action

See how initiatives and action items support district goals, so teams can focus on implementation rather than searching across separate reports.

Make progress understandable

Bring the latest available indicators and initiative status into a consistent view that helps users identify trends and questions to explore.

Support transparent reporting

Give stakeholders a shared, readable view of priorities, measures, and progress to support more informed conversations.

Ask better questions with AI

Use the district assistant to explore strategic plan information in plain language, with answers grounded in available dashboard data.

A shared view for every stakeholder

District leaders
Leadership insight

School boards
Visible accountability

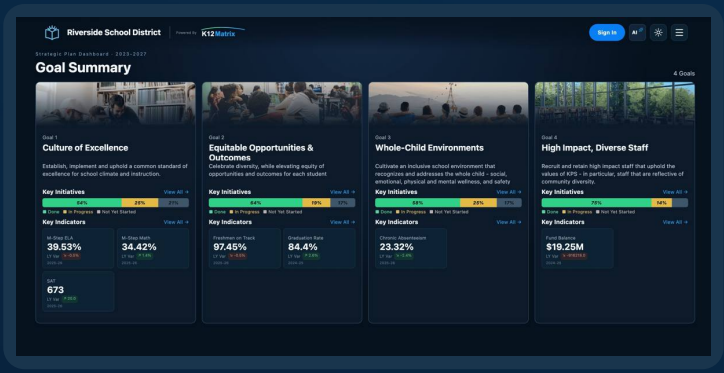

School teams
Action tracking

Community
Progress in context

Explore the plan at every level.

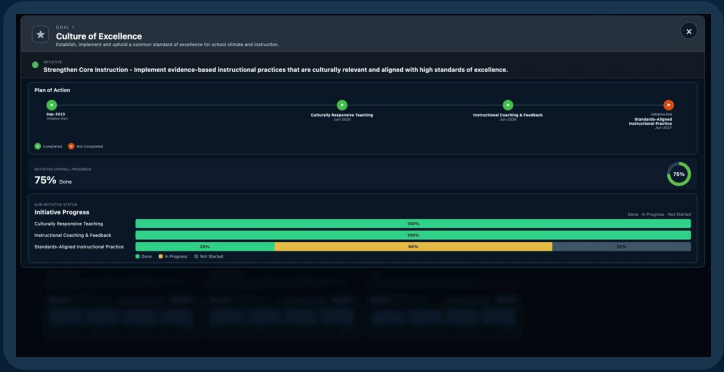

Goals at a glance

Start with a district-wide summary of strategic goals, initiative status, and key indicators. Move from the overview into the goal that needs a closer look.

Progress from goals to actions

Follow the initiatives behind each goal. See completion, sub-initiative progress, and the action timeline in a focused detail view.

Indicators with context

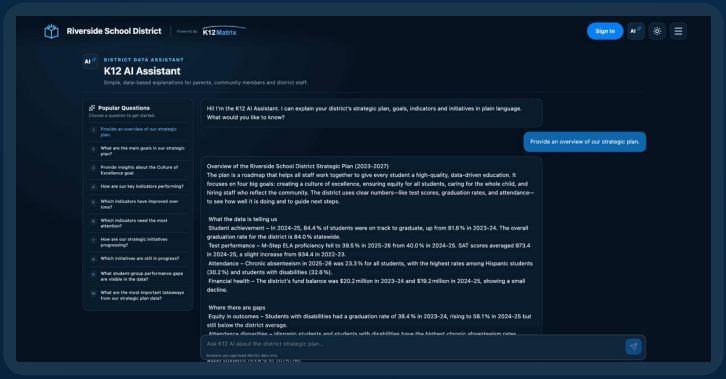

Review the latest KPI result and change over time, then open a detailed view to examine performance by year and student group.

Insight for users. Control for administrators.

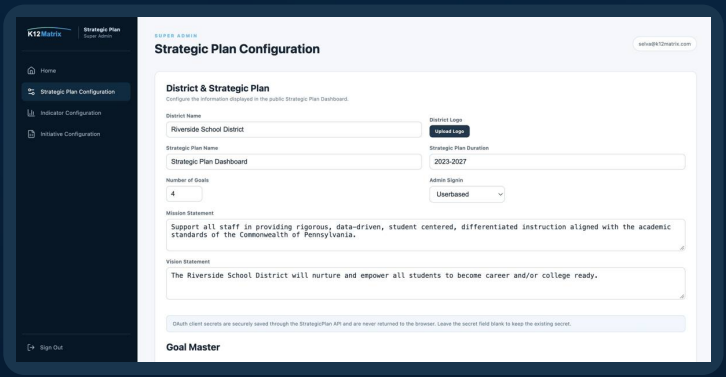

AI-powered district assistant

Ask questions about goals, initiatives, and indicators in natural language. The assistant helps users explore information already available in the strategic plan dashboard.

Manage the plan behind the scenes

When paired with Data Manager, district administrators can configure plan details and maintain the data that feeds the public dashboard.

See it in action.

Tell us about your district's priorities. We will tailor a walkthrough to the questions that matter to your team.
